

**Learn As You GrOw**

When kids are having fun playing with LEGO® bricks they probably don't even realise that they are also building key skills.

Putting the bricks together helps to build fine motor skills and hand-eye coordination, along with good foundation skills which can be developed as they grow.

Children who play with LEGO® are also learning to follow directions as they build special designs .

Children are also learning how to tell their colours and shapes.

LEGO® products helps develop a child's creativity as all LEGO® products can be found in a wide variety of colours, sizes and shapes. Kids can design their own buildings and towns based on their own ideas and imagination.
